PROFESSIONAL SUMMARY

Computer Science Engineering student skilled in Full-Stack Development, AI/ML, and Data Structures & Algorithms, with hands-on experience building scalable real-world applications. Passionate about problem-solving, modern software engineering, and developing impactful technology solutions.

TECHNICAL SKILLS

Languages	Python, JavaScript, TypeScript, Java, C
Frontend	React.js, Next.js, React Native, HTML5, CSS3, Tailwind CSS
Backend	Node.js, Express.js, FastAPI, Flask, REST APIs
AI / ML	Machine Learning Basics, TensorFlow, NumPy, Pandas, Matplotlib
Database	MongoDB, PostgreSQL, Firebase, Prisma ORM, Neon DB, MySQL
Tools & Cloud	Git, GitHub, Linux, Postman, Vercel, VS Code
Concepts	Data Structures & Algorithms, OOPs, System Design, Microservices, Authentication, OAuth, Agile/Scrum, Real-Time Systems, API Integration

EXPERIENCE

Go-To-Market (GTM) Intern — CoComply AI

Apr 2026 – Present

- Supporting market research and go-to-market initiatives for AI-driven compliance solutions
- Collaborating with product and engineering teams in an **Agile/Scrum** environment to align product workflows with customer requirements
- Preparing product documentation, onboarding materials, and competitive research to support business and sales activities

PROJECTS

Healverse — AI-Powered Health & Wellness Ecosystem

React Native | Spring boot | AI APIs

- Developed a cross-platform mobile application using **React Native** featuring intelligent health tracking, diet planning, medication reminders, and guided meditation
- Built responsive and user-friendly mobile interfaces with real-time AI integration and AI-powered personalized health insights to enhance user engagement and experience

DeepNox — Deepfake Detection System

Python | TensorFlow | Flask | React | Chrome Extension

- Engineered an AI-driven platform detecting manipulated media (Photos & Videos) via **deep learning models** trained on large facial datasets, with real-time prediction and accuracy scoring
- Deployed **Flask inference APIs** for scalable real-time classification; built a **Chrome Extension** for instant in-browser fake content detection

Karta — Full-Stack E-Commerce Platform

Next.js | Prisma ORM | Neon DB | TypeScript | OAuth | RazorPay

- Built a **production-grade full-stack platform** using Next.js + TypeScript, implemented product listing, cart, **secure OAuth authentication**, and **RazorPay** payment gateway integration
- Leveraged **Prisma ORM** with Neon DB for optimized queries, structured data modeling, and efficient schema migrations

EDUCATION

B.Tech in Computer Science Engineering — SRKR Engineering College

CGPA: 9.16 / 10.0

Graduating 2027

Bhimavaram, Andhra Pradesh

ACHIEVEMENTS

- Hackathon Winner** — Healverse, Vedic Vision 2k25
- Excellence Award** — DeepNox, Prajwalan 2k25
- 640+ LeetCode** problems solved — arrays, graphs, DP, trees, binary search ([b_ashok](#))
- Strong in **algorithm optimization** and time/space complexity analysis

EXTRA-CURRICULAR ACTIVITIES

- Competitive Coding Lead** — SRKR Coding Club
- Iconcoderz 2k26** — Organized and hosted intra-college coding competition, managing event coordination and technical activities (*Feb 2026*)
- EBR** — App Development & Technical Team: led project sprints and coordinated cross-team deliverables
