PROFESSIONAL SUMMARY

Computer Science Engineering student specializing in Full-Stack Development and applied AI/ML, with a track record of shipping production-grade web and mobile applications end-to-end. Strong foundation in Data Structures & Algorithms (700+ problems solved) and system design, with a focus on building scalable, real-world solutions.

TECHNICAL SKILLS

Languages	Python, JavaScript, TypeScript, Java, C
Frontend	React.js, Next.js, React Native, HTML5, CSS3, Tailwind CSS
Backend	Node.js, Express.js, FastAPI, Flask, REST APIs
Database	MongoDB, PostgreSQL, Firebase, Prisma ORM, Neon DB, MySQL
Tools & Cloud	Git, GitHub, Linux, Postman, Vercel, VS Code
Concepts	DSA, OOPs, System Design, Microservices, Authentication & OAuth, Agile/Scrum, Real-Time Systems, API Integration

EXPERIENCE

Go-To-Market (GTM) Intern — *CoComply AI* Apr 2026 – Present

- Drove market research and go-to-market strategy for AI-driven compliance solutions, informing product-positioning decisions
- Partnered with product and engineering teams in an **Agile/Scrum** workflow to translate customer requirements into actionable product features
- Authored product documentation, onboarding guides, and competitive analyses that streamlined sales enablement

PROJECTS

Healverse — AI-Powered Health & Wellness Ecosystem

React Native | Spring Boot | AI APIs

- Built a cross-platform mobile app in **React Native** with intelligent health tracking, diet planning, medication reminders, and guided meditation
- Integrated real-time AI-driven personalized health insights, improving user engagement through a responsive, intuitive UI
- **Winner, Vedic Vision 2k25 Hackathon**

AgriAssist — AI-Powered Smart Farming Ecosystem

React Native | Node.js | Python | MongoDB | Deep Learning

- Engineered an AI-powered mobile app for precision agriculture with crop disease detection, task/irrigation scheduling, and real-time market insights
- Built scalable **Node.js** REST APIs and Python ML microservices for image classification and predictive analytics, secured with robust authentication
- Integrated the **OpenAI API** to generate data-driven fertilizer, irrigation, and crop management recommendations

Karta — Full-Stack E-Commerce Platform

Next.js | Prisma ORM | Neon DB | TypeScript | OAuth | RazorPay

- Built a **production-grade platform** in Next.js + TypeScript with product listing, cart, secure **OAuth authentication**, and **RazorPay** payment integration
- Modeled schema and optimized queries using **Prisma ORM** with Neon DB, streamlining data migrations and reducing query latency

EDUCATION

B.Tech in Computer Science Engineering — SRKR Engineering College

Graduating 2027

CGPA: 8.99 / 10.0

Bhimavaram, Andhra Pradesh

ACHIEVEMENTS

- **Hackathon Winner** — Healverse, Vedic Vision 2k25
- **Excellence Award** — DeepNox, Prajwalan 2k25
- **700+ LeetCode** problems solved ([b_ashok](#))
- Strong in **algorithm optimization** and complexity analysis

EXTRA-CURRICULAR ACTIVITIES

- **Competitive Coding Lead** — SRKR Coding Club
- **Iconcoderz 2k26** — Organized & hosted an intra-college coding competition (*Feb 2026*)
- **EBR** — App Dev & Technical Team: led project sprints, coordinated cross-team deliverables
